

Wrist time device with function of environmental status detecting/informing

Abstract

The invention provides a wrist time device with function of environmental status detecting/informing, comprising a case for demarcating a space accommodated therein: a control circuit unit; a display unit; a memory unit; an input unit; a timer unit; a battery; a micro gases/molecules detector unit; and a spectral identification unit, so that such a device can thereby sustain a long-term use and provide the user with information about the environmental status in order to achieve warning and protection efficacy for user anywhere and anytime.
